

LOGO GUIDELINES

**On
The
Ground.**

Logo usage, spacing, colour & the story behind the full stop

Wordmark: Geologica Bold · Accent: Terracotta #E2725B

July 2026

01 THE LOGO

Construction

The wordmark is set in **Geologica Bold**, broken across three fixed lines — **On / The / Ground.** — with a single full stop in terracotta closing the mark. Every letterform has been converted to a vector outline, so the logo file never depends on Geologica being installed on whatever device or program opens it.

On
The
Ground.

The three-line stack is the primary lockup and should be treated as one fixed unit. Don't rearrange the line breaks, run the words on a single line, or drop the full stop.

The rules on the following pages are defined in proportion to the logo itself, rather than in fixed measurements — the same approach used in brand systems from Google, Slack, Spotify and Airbnb, among others. Defining spacing and minimum size relative to the mark means the rules hold whether the logo sits on a business card or a building.

02 ALTERNATE VERSIONS

Circular Lockup

This is an alternate version of the logo, built for situations where the primary lockup isn't suitable — specifically, platforms that only support a circular logo format, such as Instagram and LinkedIn profile photos. Only use it there; everywhere else, the primary lockup on the previous page is correct.

The primary lockup is left-aligned, with “Ground.” — the widest line — sitting at the bottom. A circular mask is narrowest at the top and bottom and widest through the middle, so cropping the primary lockup into a circle clips the sides off “Ground.” and the full stop with it. This version fixes that: all three lines are centred rather than left-aligned, and “The” — the middle line — sits exactly at the centre of the circle. Nothing crosses the edge.

**On
The
Ground.**

Left: the master file, on its square canvas. Right: how it actually sits once a platform applies its own circular mask.

03 SPACING

Clear Space

Clear space is the minimum buffer around the logo that must stay free of text, imagery, or any other graphic element. It protects the wordmark from feeling crowded and keeps the full stop legible as a deliberate mark rather than stray debris.

The unit **X** is defined as the height of a single line of the wordmark (for example, the height of “On”). Keep at least **1X** of clear space on every side of the logo. Where the layout allows it, 1.5–2X gives the mark more room to breathe.

X = height of one line of the wordmark (e.g. "On")

03 SPACING

Minimum Size

Below a certain size, the full stop shrinks to a speck and the counters inside “o” and “e” start to clog — the wordmark stops reading as itself.

Minimum size: 110px wide on screen, or 20mm wide in print. Below that threshold, don’t force the full three-line lockup — ask about a simplified mark instead.

OK Recommended

On
The
Ground.

260px wide and up — full stop and letterforms fully legible

OK Minimum size

On
The
Ground.

110px wide (digital) / 20mm (print) — the hard floor

X Too small

On
The
Ground.

Below 110px the full stop nearly disappears and 'e'/'o' counters clog

04 COLOUR

Colour

Two colours make up the whole system.

Ink

#000000

RGB 0, 0, 0

CMYK 0/0/0/100

Used for all wordmark text — the full three lines of “On The Ground”.

Terracotta

#E2725B

RGB 226, 114, 91

CMYK approx. 0/50/60/11

Used for exactly one thing: the full stop after “Ground”. See the “Why Terracotta” section for why this colour, specifically.

Rules

The full stop is always terracotta — never black, never any other colour, and never reversed (a black dot with a coloured wordmark). On dark backgrounds the wordmark flips to white; the terracotta full stop stays exactly as it is. Terracotta is not a secondary palette colour to use elsewhere in a layout — its entire job is to mark this one dot.

For exact spot-colour matching in print, ask your printer to match against the hex value using their own Pantone bridge tool rather than relying on a pre-guessed Pantone number.

05 USAGE

Correct Usage

These are the logo's supported states. Anything else should be checked against this document before it ships.

On
The
Ground.

Correct usage

Full color, clear space, neutral background

OK

On
The
Ground.

OK

Correct — reversed

White wordmark, terracotta full stop preserved

OK

On
The
Ground.

Correct at small sizes

Full stop stays a visible, distinct dot

05 USAGE

Incorrect Usage

Common mistakes to avoid — part 1 of 2.

On
The
Ground

Don't stretch or distort

Never scale width and height independently

On
The
Ground.

Don't compress

Never squash the proportions of the wordmark

On
The
Ground.

Don't recolor the full stop

Terracotta #E2725B is fixed — no substitutions

On
The
Ground.

Don't crowd the logo

Always keep the minimum clear space free of text/graphics

05 USAGE

Incorrect Usage

Common mistakes to avoid — part 2 of 2.

A NOTE ON COLOUR

Why Terracotta

The reasoning behind the one coloured mark in the logo

Not the colour of the cloud

Most AI companies reach for blue or purple — the colour of “the cloud,” screens, and abstraction. On The Ground’s own positioning runs in the opposite direction: the company was started in July 2023 to solve real operational problems for Singapore SMEs, and its stated values are “Real Problems First” and “Transparent Approach — clear communication, honest timelines, no hidden surprises.” The website is explicit that the work is “not theory” — working software handed to a team within a one-week sprint, not a slide deck about the future of work.

Terracotta is the colour of clay, brick and soil — literally the ground. Giving the one punctuation mark that closes the word “Ground” this colour is a small, literal detail that also happens to restate the entire brand thesis: this is where the idea touches the ground.

Why the full stop, specifically

There's also a reason the colour sits on the full stop, and not, say, the O in “Ground.” A full stop is the one character whose entire job is to mark a decision: the sentence is over, the thought is finished, here is where it lands. That mirrors how OTG describes its own delivery model — a fixed-scope, one-week sprint that ends in working software, not an open-ended strategy engagement.

One word, three lines, one full stop — and the full stop is the only part of the mark allowed a different colour, because it's the only part of the mark whose job is to end things decisively enough to move on to building the next thing.
